Introduction

This sponsorship and exhibition prospectus is enacted for the Sustainable Electricity Association New Zealand Conference and AGM 2008

We invite you to be an integral part of the SEANZ 2008 conference to be held at the Te Papa Museum, Wellington on December 11th and 12th, 2008. The theme for this year's conference is ***Renewables in the Built Environment***

The industry needs your attendance and input. The conference is your opportunity to contribute to the growth and development of ***Renewables in the Built Environment*** and stay abreast of the latest developments in New Zealand. We will bring together key stakeholders of the industry and other interested organisations to discuss and promote a deeper understanding of the challenges that impact industry development.

The opportunity to present your business, products and services to the public will be available as the exhibition area will be open to the public for the duration of the conference. SEANZ, through its public relations agency, will be promoting the conference highlighting free public access to view the latest technology in the industry from sponsors and exhibitors. This is your opportunity to promote your company in the context of ***Renewables in the Built Environment***

We have assembled a group of international speakers who are experts in the field of accelerating the growth of renewables. A New Zealand Government regulatory and policy panel and an energy industry panel that operates with the current regulations and policy – will be presenting and answering your questions on their role in enabling renewables plus providing their perspective on the barriers and the processes required to grow small scale and distributed generation with ***Renewables in the Built Environment***

RENEWABLES IN THE BUILT ENVIRONMENT

SEANZ
Auckland 2341
New Zealand
www.seanz.org.nz

This includes “real world” discussion on:

- International policy trends and learning’s for constructing New Zealand mechanisms. For example, does the trend for jump-starting local industries through direct subsidies and feed-in-tariffs have relevance to the small-scale renewable generation industry in New Zealand?
- The Resource Management Act and issues for local authorities with consenting processes. How do local bodies address these issues? What policy will make it easier?
- Have the October 2007 Distributed Generation regulations made an impact? What are the grid connect issues of the moment?
- What's going on in the market regarding buy-back of surplus small-scale energy?
- Overseas and local case studies on solar PV and wind turbine implementations with innovative approaches to market development

The SEANZ Industry Awards

An evening with SEANZ includes the SEANZ Dinner and Awards being held on December 11th. The inaugural Wind Turbine and Hydro Award presentations will ensue followed by the Solar PV Awards. Entry to this prestigious event is by ticket only and is not to be missed as attested by last year’s function.

Professional Development Stream

A professional development half day specifically designed to address renewable energy power systems, design and implementation issues, industry standards, and accurate predictions on solar resource, PV modules and inverter sizing and related activities will follow on December 12th. This will include the latest in BIPV (Building integrated Solar PV) with presentations of case studies which will also interest architects and developers. All SEANZ members will be issued with a certificate of attendance in

RENEWABLES IN THE BUILT ENVIRONMENT

SEANZ

recognition of their commitment to improving the standard of the industry.

Local Government Stream

A half day seminar on December 12th, covering the day to day resource management activities and building consent issues relating to renewable electricity generation, including the consideration of resource consent applications, designations and plan changes will be addressed for the benefit of all local bodies and authorities. With the uptake of grid-connect, all local authorities need to attend, to understand the issues, increase their knowledge of small scale renewables, enabling them to improve their processes for the benefit of their communities.

This conference is designed to encourage dialogue and establish relationships between policy and regulation makers, manufacturers, suppliers, designers, installers, integrators, local bodies' representatives and SEANZ, as the industry body. This will create an environment where business opportunities will flourish.

Kilowatt Sponsor - NZ\$5,000.00 excl GST

Benefits

- assigned exhibition space 3 metres x 2.4 metres (7.2 sqm) within refreshment and lunch area
- 2 x complimentary tickets to the SEANZ Conference Dinner and the SEANZ Awards
- 2 x complimentary registrations including lunches and morning and afternoon teas
- company logo and acknowledgement on the Conference website with a hyperlink from your logo to your own web site
- company logo and acknowledgement in all printed material
- company logo displayed on the screen in the session venue prior to each keynote presentation

Awards Sponsors - NZ\$1,650.00 excl GST x 3 available – Solar PV, Wind and Hydro Sections

Benefits

- joint naming rights with SEANZ for section awards
- each award carries naming rights (x 3 awards per section)
- presentation of awards with SEANZ at awards dinner
- company logo displayed on screen at SEANZ awards dinner
- company logo on the Conference website

Exhibitors - NZ\$1,500.00 excl GST x 4 available

Benefits

- assigned exhibition space 5 metres x 3 metres (15.0 sqm) within refreshment and lunch area
- 2 x complimentary tickets to the SEANZ Conference Dinner and the SEANZ Awards
- 2 x complimentary registrations including lunches and morning and afternoon teas
- Full specifications of location and technical requirements as per following
